PROJECTS

ShoeShop

[github](#)

ShoeShop is an e-commerce web application which offers seamless online shopping experience for users.

Implemented essential features such as product search, secure checkout, order management and cart resulting in an intuitive and user-friendly shopping experience.

- Utilized Node.js to create the backend of the application, integrated MongoDB for data storage.
- Implemented JSON Web Token (JWT) for secure user authentication and authorization, providing protected access to application resources and maintaining data integrity.
- Integrated Stripe as the payment gateway, allowing users to make secure online transactions
- Implemented interactive cart and wishlist functionalities providing users with a seamless shopping experience without page reloads.
- **Technologies used:** Node.js|Express.js|Mongoose|Cloudinary|React|TailwindCSS|

Spotify-Clone

[github](#)

- OLX Clone built using **Next.js**
- Implemented user authentication and authorization using **NextAuth**
